Treasure Salvors, Inc. Certificate of Authenticity

Silver Ingot
Recovered from the

NUESTRA SEÑORA DE ATOCHA

This is to certify that the silver ingot described on this certificate was recovered from the Spanish shipwreck, *Nuestra Señora de Atocha*, by Treasure Salvors, Inc.

On September 6, 1622, the heavily laden treasure galleon of King Philip IV's Terna Firme fleet sank in a raging hurricane near the Florida Keys. Two hundred and sixty people and tons of silver, gold and other precious cargo were lost to the sea. All attempts to locate the wreckage of the *Atocha* failed until the location of the vast silver cargo and part of the lower hull structure was found July 20, 1985, by Treasure Salvors, Inc.

Over one thousand silver bars were listed on the ship's manifest. The majority of the ingots were the property of individuals, although four tons of the cargo was revenue; and one hundred thirty-three bars were shipped in thirty-four boxes marked with the red crown mark of Philip IV.

Many of the silver bars were mined and processed in Upper Peru (modern Bolivia). Each ingot was poured into a mold and then struck with the serial number (A), which would be listed on the ship's manifest. The assayer would then remove his "bite" (B) to attest to the purity of the silver. Once purity was established the ingot was struck with the "Ley" or fineness number (C), 2400 being the purest. Each bar other than the original "Quinto" was subject to 20% tax and was struck with the tax seal (D), often in several locations on the bar, indicating that the tax had been paid. Monograms and designs (E) indicated the owner or shipper. Various other marks (F) of unknown origin were made by various handlers and shippers recording their transaction with the bar. Some bars are dated with the year (G).

Certified this 15th day of September, 1986.
